

March 1, 2023

Hello Store Managers and Senior Assistant Managers,

To help provide more up-to-date information on the functionality and maintenance for the lift equipment in your store, a new course is now available: **Lift Inspection and Safety**.

### **What you need to know**

- The Lift Inspection and Safety course has replaced the Using Lifts course, and will be assigned annually to all Service Techs and up ahead of your region's scheduled Dekra Inspection.
- The course should take approximately 10-15 minutes to complete.

### **Our ask of you**

- Please keep an eye out for the Dekra inspection email announcing your region's upcoming inspection.
- When you receive the email, please ensure all assigned employees log in to the LMS and complete the Lift Inspection and Safety course and Acknowledgement by the due date.

**NOTE:** If you have already had your Dekra inspection this year, you will not need to complete the Lift Inspection and Safety course until next year.

If you have any questions, please use the Feedback button on the [Safety Leader Leadership Responsibilities page](#).

Thank you for striving to be the BEST!
