

DC – Crossdock Product Breakdown

Purpose The purpose of product breakdown is to ensure the efficiency and safety for the zone leaders.

Guidelines Always use proper lifting while moving pallets around

Crossdock Product Breakdown

Step	Action
1	Lay pallet(s) out.
2	Down stack the product on to the pallet(s) based on brand and size. <ul style="list-style-type: none"> a. Larger tires should be placed on bottom to build a solid foundation. b. Wheels should be built in PYRAMID form based on size, with article #s together and visible.
3	Pallets should be built in a safely manner. <ul style="list-style-type: none"> a. No more than 7 tires high per barrel. b. Maximum of 2 barrel stacks of tires per pallet. c. Depending on dimensions of tire, 3 barrel stacks can be made per pallet. d. Wheels no more than 5 boxes high per stack. e. Maximum of 4 stacks of wheels per pallet.
4	Make sure all product labels are visible as they are placed on pallet.
5	Repeat all steps until all Crossdock units have been palletized. <div style="display: flex; justify-content: space-around; align-items: center;">   </div>
