

Discount Tire is using Microsoft Authenticator Multi-Factor Authentication (MFA) for Authentication. This will provide us with enhanced security for our Discount Tire user accounts when accessing company information from outside the Discount Tire network. The instructions below will walk you through downloading the app and connecting it to your Discount Tire M365 account.

NOTE: You will need to have access to both your **smartphone** and a **PC** to complete this 3-part process.

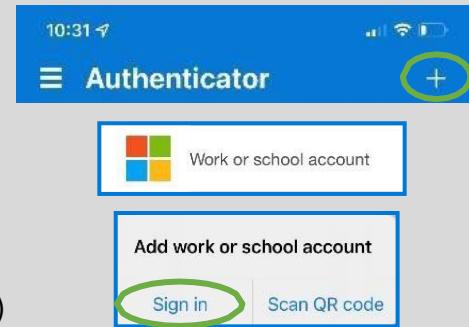

PART 1: USING YOUR PHONE

Install the Authenticator App on your Phone

Do you already have the Authenticator app?

Some users already have the app from previous jobs or personal use. Follow these steps to add your Discount Tire account to the existing Authenticator app.

1. Open the **Authenticator app** on your phone.
2. Click the **+** to add a new account.
3. Select **Work or School account** and click **Sign in**.
4. Sign in using your **Discount Tire M365 account**. (username@discounttire.com)

1 On your phone, download the **Microsoft Authenticator app** from the App Store or Google Play Store.

[Download Microsoft Authenticator for Android](#)

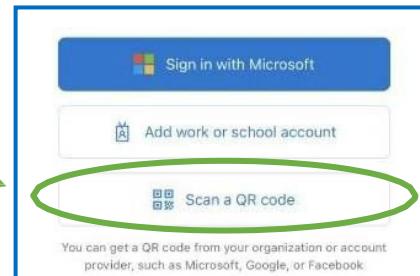

[Download Microsoft Authenticator for iPhone](#)

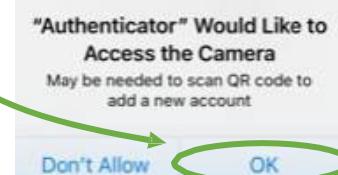

2 Open the app on your phone. Microsoft will display a “Your Privacy Matters” screen, click **I agree**.

3 On your phone screen, click **Scan a QR Code**. This will trigger the permission to access your phone’s camera. Click **OK**.

4 You’re not done yet - continue with **Part 2: Using Your PC**.

PART 2: USING YOUR PC

Connect your Phone App to your M365 Account

5

On your PC, open the link below to start the **AUTHENTICATOR SETUP** and sign into your Discount Tire M365 Account. It is preferred to register when using VPN or on the Discount Tire network.

<https://aka.ms/mfasetup>

Fill in **username@discounttire.com** and click **NEXT**.

Sign in with your organizational account

Sign in

Next

Fill in your password and click **SIGN-IN**.

If you receive a pop-up security warning regarding trusted sites, click **ALLOW** to continue.

6

Choose where you want to receive a verification code (Authentication phone). Select your country and add your phone number. Click **NEXT**.

Additional security verification

Secure your account by adding phone verification to your password. View video to know how to secure your account

Step 1: How should we contact you?

Authentication phone

United States (+1)

Method

Send me a code by text message

Call me

Fill in United States and enter your mobile phone #

Select to receive the code via text

Next

Your phone numbers will only be used for account security. Standard telephone and SMS charges will apply.

7

Once you receive the verification code on your phone, enter it on the PC screen and click **VERIFY**. When it states the verification is successful, click **DONE**.

Additional security verification

Secure your account by adding phone verification to your password. View video to know how to secure your account

Step 2: We've sent a text message to your phone at +1 3140000000

Verification successful!

Done

8

You will be redirected to your M365 account's Profile page. Click **Additional Security Verification**.

10

You're not done yet – continue to Part 3: Using Your Phone.

PART 3: USING YOUR PHONE

Finish Configuring your Phone App

11

Open your phone's camera and aim on the **QR code** displayed on the PC screen.

12

Select **Allow** when presented with the Authenticator notifications message on your phone.

13

Click **Next** on your PC screen. This will prompt your account to verify your phone.

14

Notice your PC screen will display a message requesting you to respond to the **Approve sign-in?** pop-up message. On your phone, click **Approve**.

IMPORTANT: If you encounter an error message, repeat steps 11 through 15.

15

You are DONE with the setup!
You can close the mobile app and Additional Security Verification screen on your PC.

16

To confirm your activation, go to the [My Sign-Ins page on Microsoft.com](https://myaccount.microsoft.com/signinmethods). If you see **Microsoft Authenticator listed as a sign-in method**, it means that you are activated. This site can also be used to update your devices and phone numbers.

Configure mobile app

Complete the following steps to configure your mobile app.

1. Install the Microsoft authenticator app for Windows Phone, Android or iOS.
2. In the app, add an account and choose "Work or school account".
3. Scan the image below.

IMPORTANT:

If you are unable to scan the QR code, follow these instructions to set up the mobile app using the code and URL.

Configure app without notifications

If you are unable to scan the image, enter the following information in your app.
Code: 538 652 049
Url: <https://mobileappcommunicator.auth.microsoft.com/activate/868135282/EUS>

"Authenticator" Would Like to Send You Notifications

Notifications may include alerts, sounds, and icon badges. These can be configured in Settings.

Don't Allow**Allow****Next****cancel**

Verifying phone.

Please respond to the notification on your device.
