Dunk Tank Equipment Update1. Did you have any difficulties installing the replacement part?

The installation was not hard at all. When the Special Safety Focus came out myself and our 5's manager ordered the correct part. After replacing the part we checked to function of the dunk tank and it work correctly.

DUNK TANK EQUIPMENT UPDATE

Mike had no problem installing the new breather vent. The arm works much better now.

Dunk Tank Equipment Update

We already had a breather piece installed onto our dunk tank. However, I went ahead and ordered the new part that it showed specifically in the picture. I wouldn't imagine that putting in the part would be hard, but if so, I will write back.

Thanks for your time,
Chris Lewis
Senior Assistant

Dunk Tank Equipment Update
Replacement of the breather vent was
straight forward and only took 5 min
to replace.

Dunk Tank Equipment

1. We have ordered the replacement part
and are awaiting its arrival. I have talked to
our 5's manager to keep an eye out for the
part coming in so we can change it out as
soon as its here. Installation looks like it
should be easy once we get the part.

The new replacement part has been ordered.
As soon as it arrives and has been installed I
will let you know.

Thanks,
Danny
