## INJURY TRENDS | OUR PEOPLE

### February 2022 Employee Injury Awareness

#### Total Recordable Incidence Rate

(TRIR) represents the number of injury cases per 100 employees that resulted in the employee needing medical treatment beyond first-aid. In the chart to the right, you can see how your regional TRIR compares from 2021 through February.

Flawless execution of Critical to Safety Best Practices is the first line of defense against injuries.

### CLOSE CALL VS INJURY REPORTING

Over the last few months, we have received more and more close calls. We wanted to take the time to say **Thank You** to those of you reporting these close calls, however, there is still room for improvement. Some close calls reported are actually injuries.

**Note: All injuries should be reported to the Employee Injury Line.**
