WORKPLACE CLEANLINESS IS KEY

Occupational hazards (anything in the workplace that can cause harm) are much more common in a cluttered, dirty and unorganized environment. The hazard(s) can easily go unnoticed and lead to serious injuries. Here are a few examples that we see on pretty much a daily basis:

- Tripping over loose objects on floors, stairs, and platforms
- Being hit by falling objects
- Slipping on greasy, wet, or dirty surfaces
- Striking against projecting, poorly stacked items or misplaced materials
- Blocked exits

This month, we are asking you to focus on your workplace's general cleanliness. As a team, we need to always have a 360 awareness of our work environment to avoid unnecessary injuries. Below is a checklist to help ensure that your cleaning initiative is easy, actionable, and highly adaptable. Work through your people to get it done.

ESTABLISH A CLEAN AS YOU GO MENTALITY!

- Determine basic areas to clean/organize
 - Floors - keep free of debris/trash, sweep regularly
 - Exit doors – ensure nothing is blocking the exit doorway
 - Aisles/passageways – maintain a clear walkway without any obstructions
 - Trash cans/recycle bins – empty trash before it is overflowing
- Set practical expectations and provide simple directions
- Lead by example
- Reinforce the reasons for keeping the workplace clean
 - For compliance
 - To reduce hazards and prevent injuries

CALL TO ACTION: Create a plan to maintain a clean and organized environment.

Slips, Trips, & Falls

You can slip when you lose your footing, you can trip when you catch your foot on or in something, and you fall when you come down suddenly.

Spills, loose mats, rugs, and stepladders are some of the common causes of slips, trips, and falls.

In addition, poor lighting and clutter can cause injuries such as sprains, strains, bruises, bumps, fractures, scratches, and cuts.
