## WORKPLACE CLEANLINESS IS KEY

Occupational hazards (anything in the workplace that can cause harm) are much more common in a cluttered, dirty, and unorganized environment. The hazard(s) can easily go unnoticed and lead to serious injuries. Here a few examples that we see on pretty much a daily basis:

- Tripping over loose objects on floors, stairs, and platforms
- Being hit by falling objects
- Slipping on greasy, wet, or dirty surfaces
- Striking against projecting, poorly stacked items or misplaced materials

**Managers, this month we are asking you to focus on your location's general cleanliness. As a team, we need to always have a 360 awareness of our environment to avoid these unnecessary injuries. Below is a checklist to help ensure that your cleaning initiative is easy, actionable, and highly adaptable. Work through your people to get it done.**

- Determine basic areas to clean/organize
  - Floors - keep free of debris/trash, sweep regularly
  - Exit doors – ensure nothing is blocking the exit doorway
  - Aisles/passageways – maintain a clear walkway without any obstructions
  - Trash cans/recycle bins – empty trash before it is overflowing
- Set practical expectations and provide simple directions
- Lead by example
- Reinforce the reasons for keeping the workplace clean
  - For compliance
  - To reduce hazards and prevent injuries

### Order if you or your people need any of the following items:
