

= High risk of employee injury, if not done

Employee being observed:		SAFE	AT RISK
	Uses only 1 tire bar		
	Stands at the 6 O'Clock position (front of the changer)		
	Firmly grips the tire bar throughout the whole process (no open palm)		
	Does not release grip until all tension is released from the tire bar		
	Keeps face out of danger zone (path of the tire bar)		

Tally up all "Safe" processes and record the score below:

SAFE
