

## Inspector Instructions

Tap on the chart icon at the top of the screen to view the driver's Hours of Service events for the past 8 days. To use the chart, you can:

1. Select Events by tapping on the left and right arrow buttons at the bottom corners of the screen or by tapping on the circles on the chart. The location of the selected event and any driver notes will be shown underneath the chart.
2. Change the selected day using the calendar button at the bottom of the screen.
3. Using the zoom in and out buttons at the bottom of the screen to change the time scale of the chart for easier reading.

The time values at the top of the main screen show:

1. The Driving time remaining for the current driver according to the Federal 11 Hour rule.
2. The On-Duty time remaining for the current driver according to the Federal 14 Hour rule.
3. The Driving plus On-Duty time remaining for the current driver according to the Federal 60/70 Hour rule.
4. The amount of time the current driver has been in the current status.

Tap on the list icon at the top of the main screen to show a summary of each of the previous 8 days. From this screen, you can select an individual day by tapping on it. You will then be taken to a list of events for that day where you can add and edit events (if allowed by employer), delete an event via the edit screen (if allowed by employer) or sign the log for the day.

Tap on the down arrow at the right of the main screen to view a summary of the driver's On-Duty and Driving time for the last day and the last 8 days. The screen shows the lengths of time the driver:

1. Has been On-Duty or Driving today.
2. Has been On-Duty or Driving the last 7 days.
3. Has available On-Duty tomorrow before the Federal 60/70 Hour rule is breached.
4. Has been On-Duty or Driving the last 8 days.
