

Managing Adjustments

Overview

Tires and Wheels

After adjustments are invoiced in the POS, manage them on the Handheld MIM scanner or in the Desktop MIM. You can View, Edit, Scrap, Send to Warehouse, and Return to Vendor.

Stores: Please make sure to follow instructions to know WHEN you use RTV instead of RTW.

IMPORTANT:

- The person logging into the Desktop MIM or scanner must be assigned to the site where the adjustments are currently located.

Include Required Information

Marketing Manager must ensure Sales Team always collects and includes accurate data:

- DOT #
- RMA #
- Miles On
- Miles Off
- Return Reason
- Tread Depth
- Customer Information - Verify this is accurate!

Vendors need this information to meet NHTSA requirements. If this information is not correct, the claim will probably be declined.

Note: For wheel adjustments, only RMA # and Return Reason are required.

Warehouse: Receiving Adjustments

Receive adjustments in the same way you receive other products.

For details, see:

[Receiving Products and Non-Merchandise Orders](#) on the Knowledge Center.

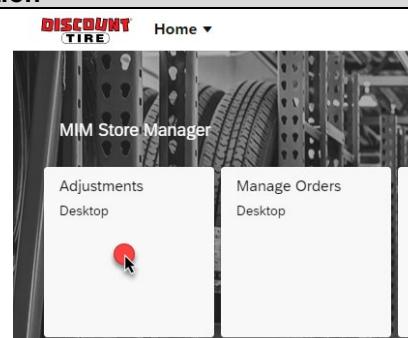

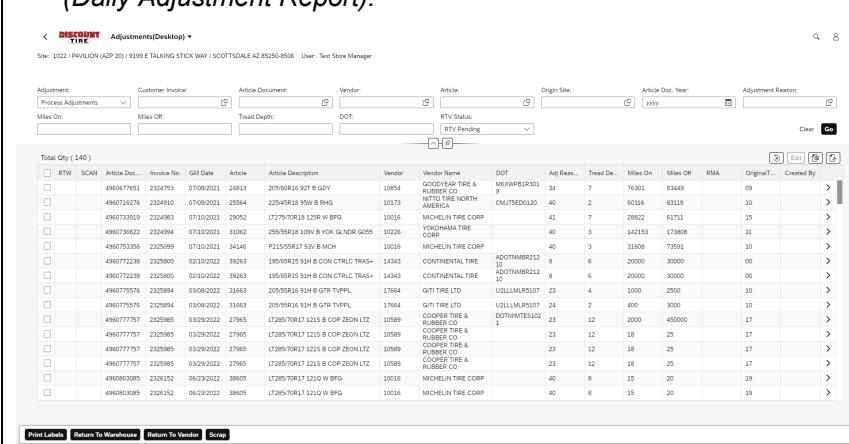

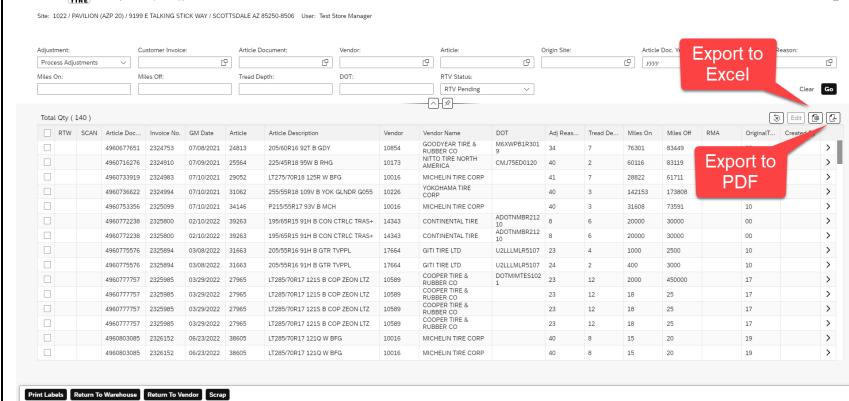

IMPORTANT: Do NOT check the Delivery Complete checkbox.
