

Vision Wheel Heavy Hauler tire products are warrantable at Discount Tire / Americas Tire's 1,230+ store locations.

The Heavy Hauler warranty covers failures due to materials or workmanship within 3 years from the date of production. The first 18 months from date of production also includes 100% replacement due to road hazards. The tire warranty is non-prorated, 100% replacement if the tire is not worn beyond 3/32 remaining tread depth.

The tire warranty covers the replacement and shipment of the tire only and does not cover mounting, balancing or any costs to replace or repair other property.

- This warranty does not cover travel, owner's time or any other expenses.
- The failed tire must be provided for inspection to determine the cause of failure.
- If a suitable amount of the tire carcass is unavailable for inspection to determine the causes of failure, the warranty tire replacement will be denied.
- All failed tires must complete the DTC warranty claim / verification process.

If a Heavy Hauler tire is not available for a qualified warranty replacement, a tire brand with similar construction and cost may be substituted as a warranty replacement.
