

# SAFETY IN ALL SEASONS

**TPMS IS A FEDERALLY MANDATED SAFETY SYSTEM IN YOUR VEHICLE, MUCH LIKE YOUR SEAT BELT OR AIR BAG...**

- ▶ “A service provider would violate the ‘make inoperative’ prohibition of the *Motor Vehicle Safety Act* (49 USC 30122b) by installing new tires and wheels that do not have a functioning TPMS system.”
- ▶ “By removing tires & wheels with functioning TPMS sensors, and replacing them with tires & wheels *without* TPMS sensors, the repair business has knowingly removed an essential part of the TPMS system.”

—U.S. Department of Transportation letter to the Tire Industry Association (November 22, 2011)

**DON'T IGNORE THE  AND STAY SAFE!**
