---

1-25-2019

## 22 TON / 10 TON JACKS REPLACEMENT

**REASON:** The 22 ton bottle jacks have a small lifting platform and in some instances require our technicians to be under the vehicle to lift it properly.

The new 10 ton Long reach jack has a larger lifting platform and a longer body and handle. This will allow our technicians to not have to go under a vehicle to lift properly.

### **ACTION:**

We have ordered 2 10 ton jacks for every store. Starting 4-15-2019 we will start shipping these jacks to Regional Warehouses. Regional warehouses will deliver these Jacks to the store.

**22 ton Jack removal:** These jacks can be sold to employees for a donation to the BTHAF or recycled.

Regional Warehouses will verify that these jacks have been removed along with your Safety coordinator.
