

## Repairing Foam Filled Tires

**Introduction** This procedure applies to all foam filled tires.

### Repairing foam filled tires

Follow these steps to repair a foam filled tire:

Step	Action
1	<p>To have a comfortable working area, a 4x4 inch square cut area is sufficient.</p> <p>Carefully remove the cut-off foam strip from the bonding layer. To do this, carefully cut out with <u>a pair of rounded-end scissors or razor knife</u>.</p> <p><b>Be careful not to damage the interior rubber when cutting the foam.</b></p> 
2	Finish the repair procedure by following the Regular repair procedures.
