1988-1998 FORD F-250/350 FITMENT ADVISORY

PRODUCT AFFECTED: **8-165.1 bolt pattern wheels with 123mm centerbore**

REASON: The Ford hub is 124mm at the base. This will allow the wheel to fit over the hub until 7mm before the mounting plate, when it bottoms out.

When installing wheels on this vehicle verify that the wheel is flush with the mounting surface.
