

Aged Tire Inventory Reduction

Description

The following process gives the stores the opportunity to reduce aged inventory stock. If tires are determined as aged inventory, they will be picked up by the Regional Adjustment Warehouse, sold on eBay by the DTD eBay team, and shipped to the customer by the Regional Adjustment Warehouse.

Guidelines

Criteria to determine if aged tire inventory can be sold on eBay:

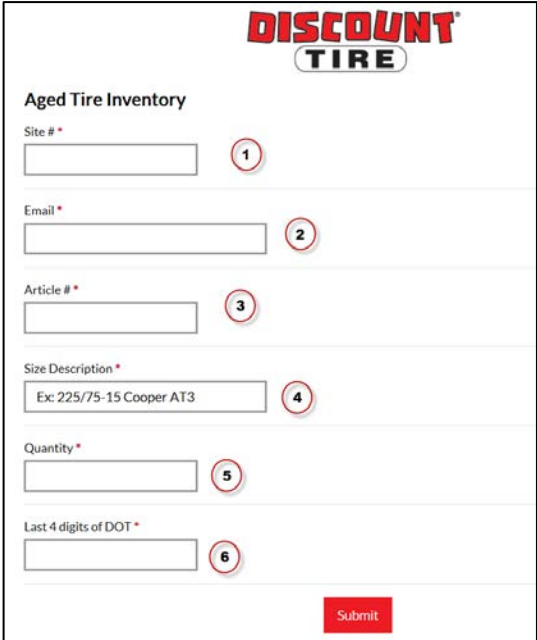

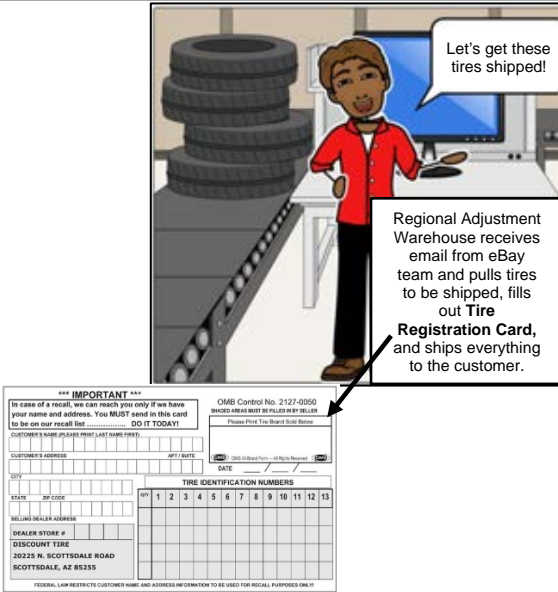

- Date on Tire (DOT) indicates tire is 4 to 6 years old
- No damage or run on tire
- Do not submit tires that are "A moving articles" (Managers discretion)

Step	Discount Tire Store Action	
Identify Products to be Sold on eBay	1	<div> <p>a. Store manager checks all inventory for DOT</p> <p>b. Store manager identifies tires with DOT that are 4 to 6 years old with no damage or run</p> </div> 
	2	<div> <p>a. Store manager approves tire to be sold on eBay at their discretion</p> <p>b. Store manager calls Regional Adjustment Warehouse to notify them of the aged inventory</p> <p>c. Regional Adjustment Warehouse creates a Store Transfer Order (STO) to the Regional Adjustment Warehouse</p> </div> 
Tires Picked up by Regional Adjustment Warehouse	3	<div> <p>a. Tires are moved to the designated pickup area for the Regional Adjustment Warehouse truck</p> <p>b. Regional Adjustment Warehouse will pick up tires during their normal pickup</p> </div>
