

## **Physical Inventory - What you should know...**

- Save time, prep inventory: Tires lined up, labels out, within reach.
- Start inventory first thing in the morning. Count any time during business day.
- Receive any open orders before the day of inventory.
- Now you can count the same article with either scanner.
- Apprentice techs and up can use the scanner to count during inventory.  
All desktop MIM functions MUST be performed by Manager/Senior.
